

## Outdoor cabinet description:

With simple, intelligent and efficient characteristics, the Integrated outdcM cabinet helps operators realize the characteristics of simple network deployment, intelligent management, efficient operation and maintenance & smooth evolution in the future.

The system integrates power distribution system, DC power supply system, temperature control system, lithium battery system and monitoring system to provide safe and reliable energy supply and working environment for the main equipment.

Modular design is adopted, which can be used independently or combined arbitrarily to meet different construction needs, greatly accelerate the supply speed, and facilitate users to combine or expand capacity arbitrarily..5

## Application:

**Outdoor gathering station**

**Communication site**

**Outdoor 2 / 3 / 4 / 5G access layer station**

## Production scenes:

Cabinet stocking:
