

Description:

OEM Fiber Optic PLC Splitter 1x8/1x16/1x32/1x64 SC LC upc apc Connectors simplex duplex adaptor Rack mount fiber optic splitter

Fiber Optic splitter is also called optical splitter, is one of the most important passive devices in optical fiber link, is with multiple inputs and multiple output end of the optical fiber connected devices. The fiber optic splitter by the light splitting principle can be divided into the fused biconical taper (FBT) and planar waveguide type (PLC).

Features:

- Low Insertion Loss, Low PDL, High Return Loss;
- Uniform Power Splitter
- Compact Design
- Wide Operating Wavelength
- Wide Operating Temperature
- Qualified Under Telcordia GR-1221 and GR-1209

Application:

Fiber to home

Community network

Multimedia Classroom

Network control room

Corporate broadband
